ABOUT ME

I am a Computer Engineering student at Istanbul Arel University, focused on continuously developing my technical skills in software development and engineering. I continue to improve myself through academic and personal projects I have participated in and developed. In addition, I have a strong interest in sports, which contributes to my discipline and teamwork skills.

EDUCATION

ADILE MERMERCI ANATOLIAN HIGH SCHOOL

Sept. 2018 - June 2022

ISTANBUL AREL UNIVERSITY

Oct. 2022 - June 2023

English Preparation

Oct. 2022 - Current

Third-year Computer Engineering Student

ABOUT PROJECTS

I have worked on a total of four projects, one in previous years and three during the current academic year. These include a Java-based Hotel Reservation System; a Grain Storage and Management Database System developed using SQL as part of a Database course; a Smart Agriculture Monitoring and Control System developed in C++ using IoT sensors, a gateway, and TCP sockets for the Data Communication and Networks course; and a machine learning project titled "The Effects of Sleep, Stress, and Lifestyle on Heart Disease: Evidence from BRFSS Data." All projects can be reviewed in detail via the GitHub link provided above.

SKILLS

Java, C++, Python, SQL
Database Design & Management, Microsoft SQL Server
TCP/IP, Socket Programming
Machine Learning & Data Analysis
